This special issue of the Revista Brasileira de Ciência, Tecnologia e Inovação (RBCTI) brings twelve unpublished papers, which deal with different approaches related to environmental studies, carried out in many states of Brazil. These are studies developed by professors and post-graduate students of different institutions.

The papers were presented at the 3rd International Congress of Environmental Engineering, Luso-Brazilian (3ºCIEA) and were previously reviewed and approved by the Conference's Scientific Committee.

3ºCIEA is an conference promoted by the 05 Brazilian universities (UFRGS, UNICAMP, UTFPR, UNEMAT e UFTM) e 03 Portuguese universities (Algarve, Coimbra e Porto). The Conference brought together 18 thematic areas (Siltation of Reservoirs and Lakes; Natural Disasters; Environmental Education; Renewable Energy; River and Coastal Morphological Studies; Tools Applied to Water Resource Management Instruments; Urban Mobility; Climate Change and Extreme Events; Public Policies, Legislation and the Environment; Atmospheric Pollution: Monitoring and Control; Prevention of Landslides; Erosive Processes and Gully Control; Reuse or Reutilization of Solid Waste; Water Resources and Water Quality; Water Security and Multiple Uses of Water; Sustainable Drainage Systems; Liquid Effluent Treatment Systems and Innovation; Techniques and Studies for the Recovery of Degraded Areas) and received 326 papers during this edition.

Regards,

The Editors, Revista Brasileira de Ciência, Tecnologia e Inovação

**President of the Organizing Committee of the 3rd International Congress of Environmental Engineering, Luso-Brazilian:** CRISTIANO POLETO - UFRGS
